# What are manifolds?

Input raw data

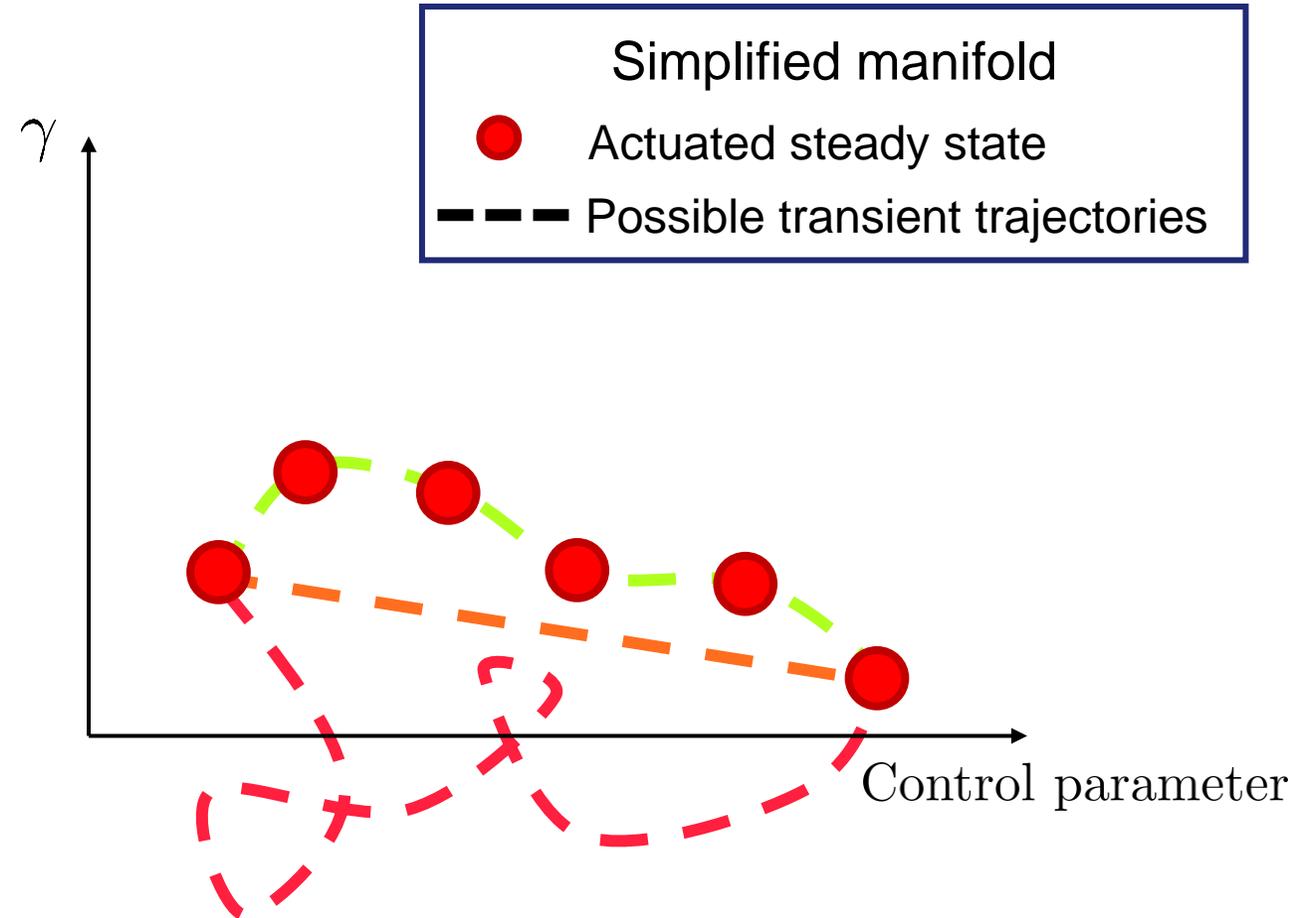

**Manifold**

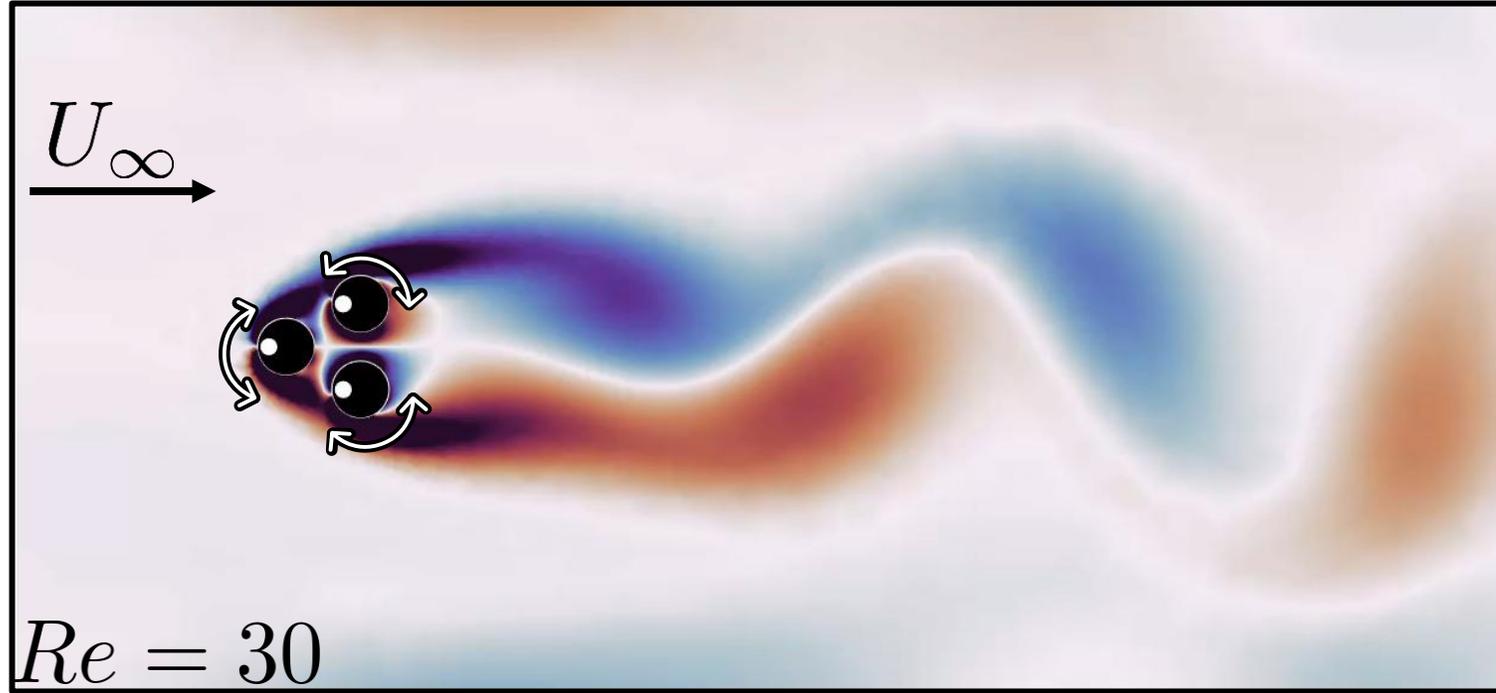

Farzamnik, E., Ianiro, A., Discetti, S., Deng, N., Oberleithner, K., Noack, B. R., and Guerrero, V. (2023). From snapshots to manifolds—a tale of shear flows. *J. Fluid Mech.*, 955:A34.

## Motivation

- **Why manifolds?**
  - We need reduced-order models
- **Why actuated?**
  - To build control-oriented model
- **Challenge?**
  - Include the transient effects

## Test case: The fluidic pinball

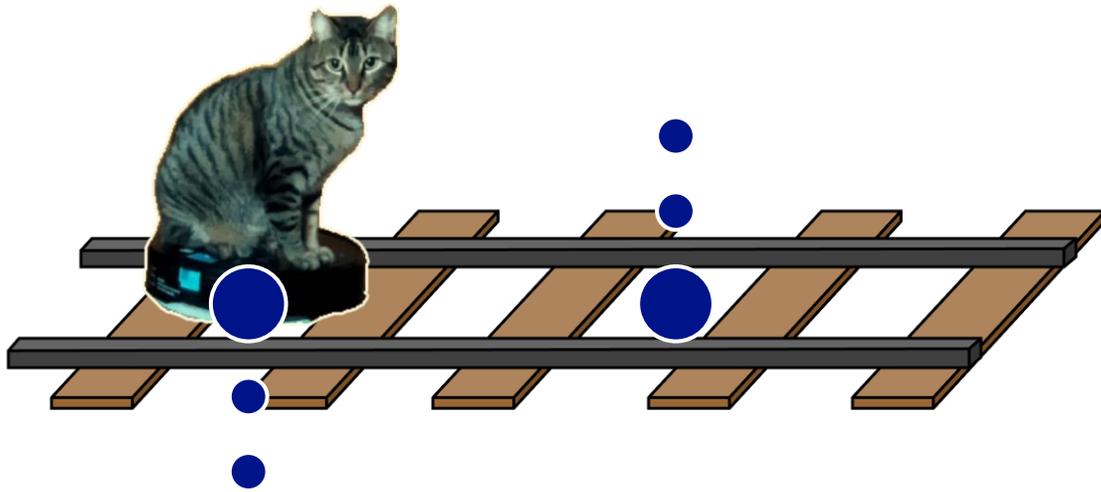

- Bifurcations
- 6 actuation mechanisms

**Encapsulates the main features of wake flows**

# What I have done in my ongoing PhD journey

## Comparative analysis of manifold learning techniques

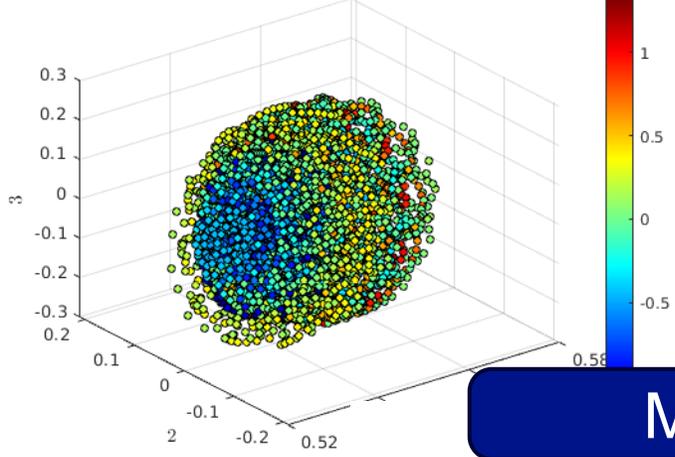

### Literature review

- Manifold learning
- Data-driven methods

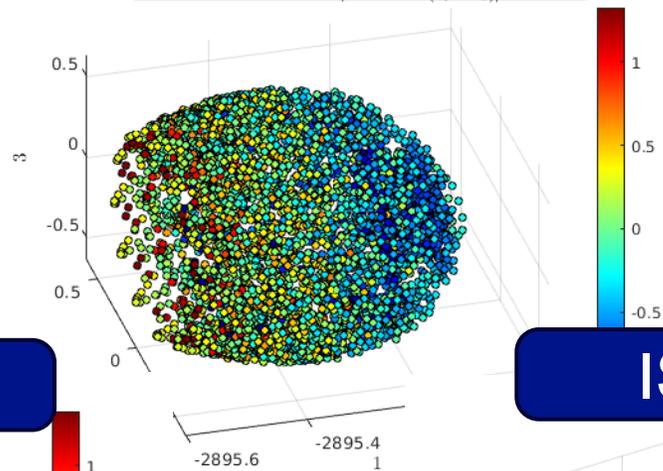

# Comparative analysis of manifold learning techniques

## Development of manifold learning codes

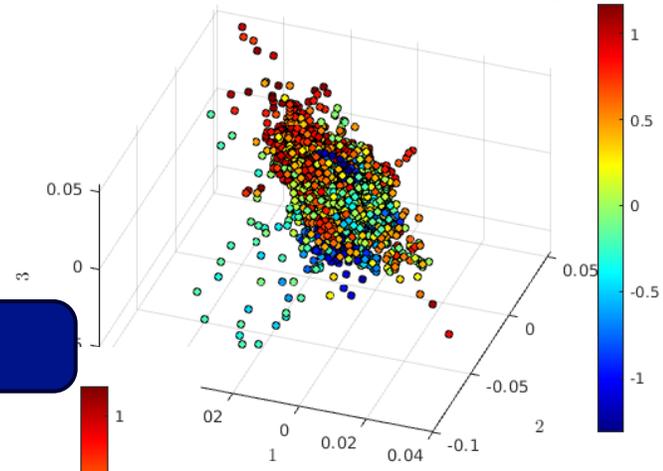

PCA

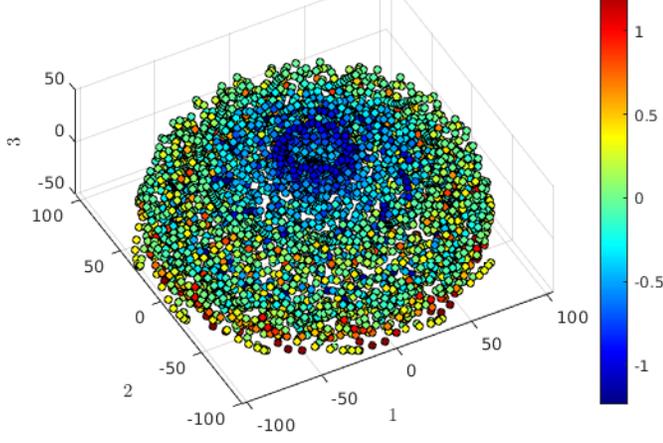

kPCA

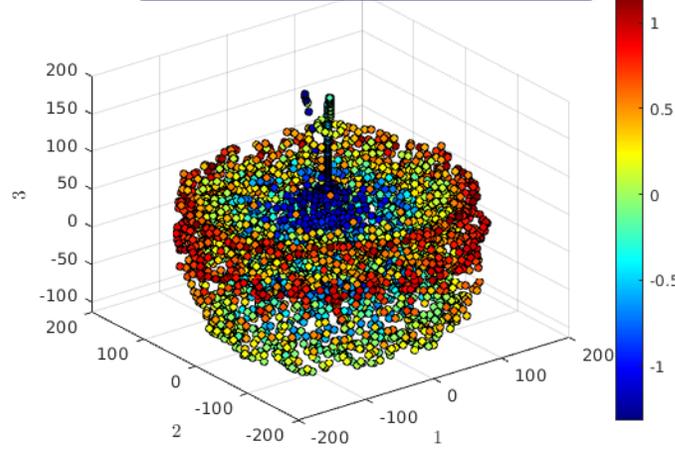

LLE

MDS

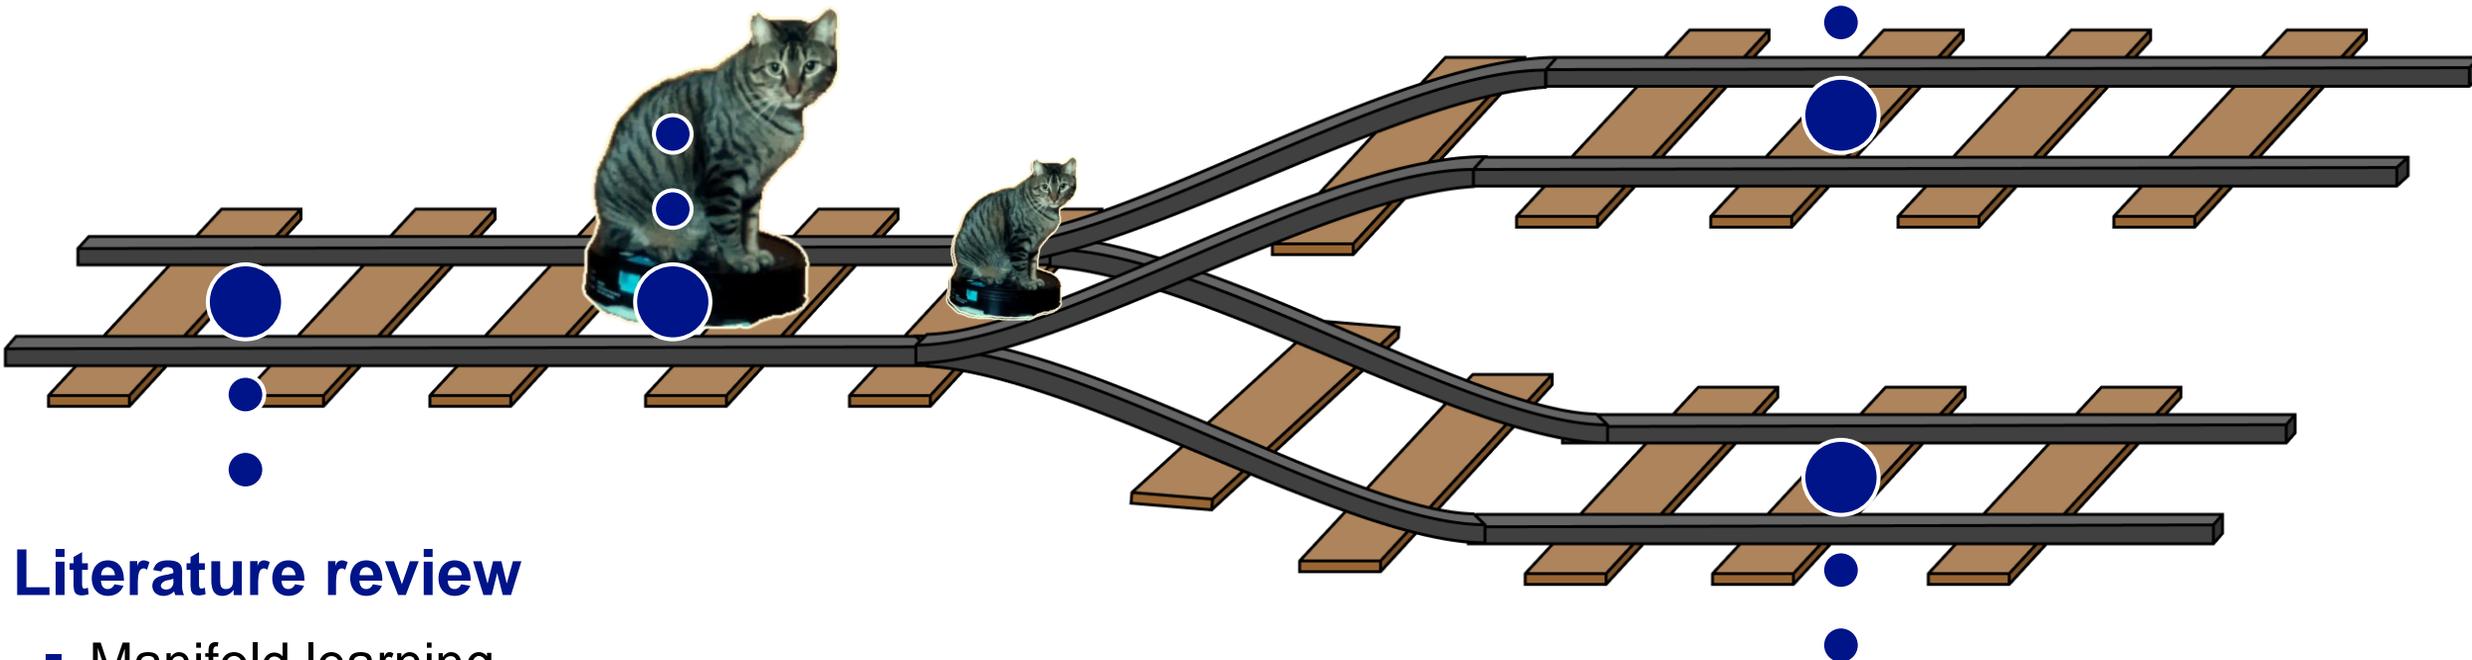

ISOMAP

# What I have done in my ongoing PhD journey

## Comparative analysis of manifold learning techniques

## Analysis & modelling of the fluidic pinball under time-varying actuation

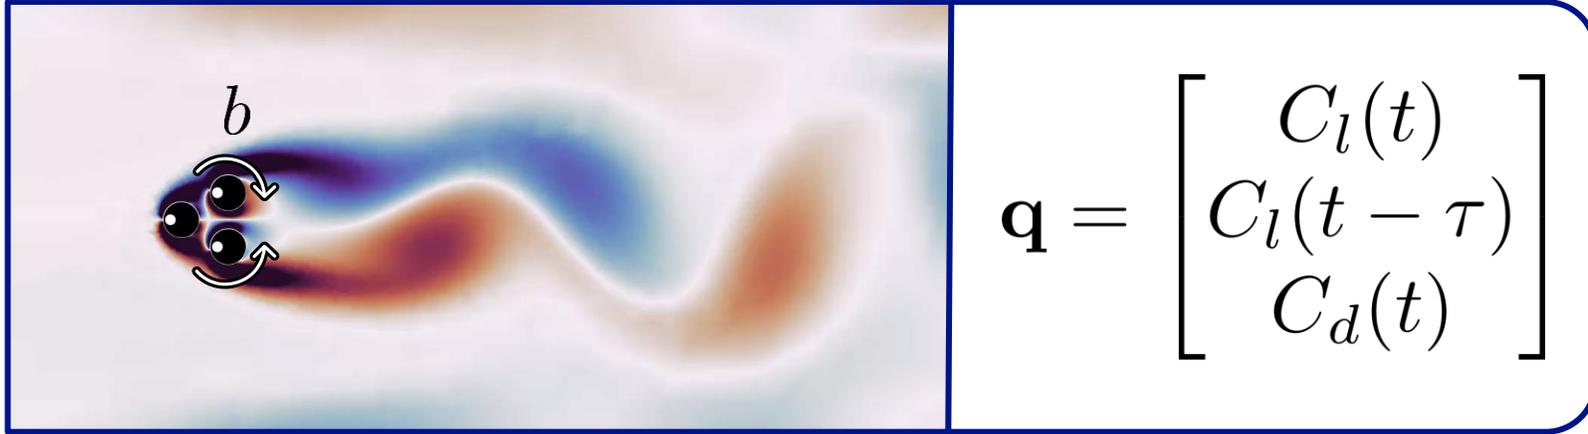

## Literature review

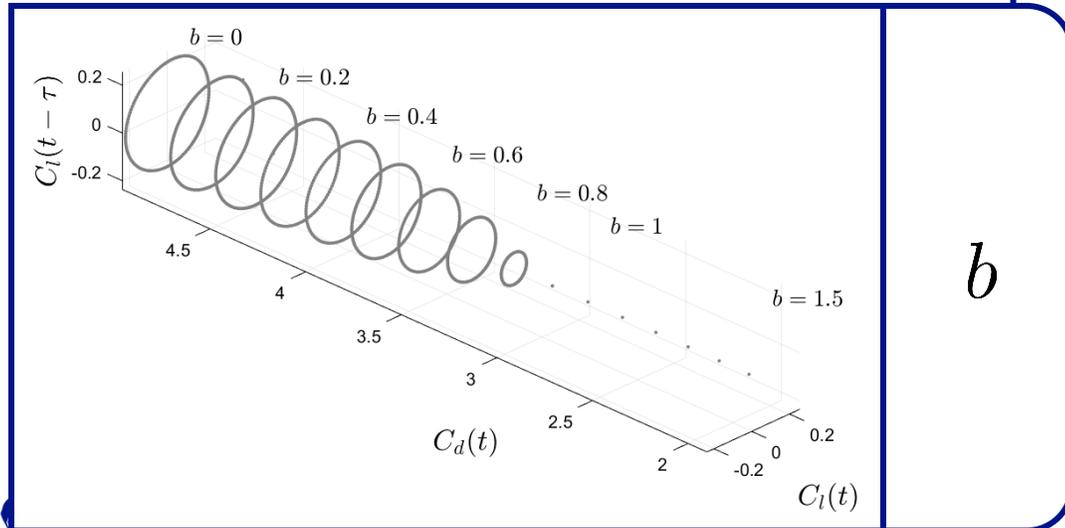

- Manifold learning
- Data-driven methods

## Fluidic pinball experiment

# Analysis & modelling of the fluidic pinball under time-varying actuation

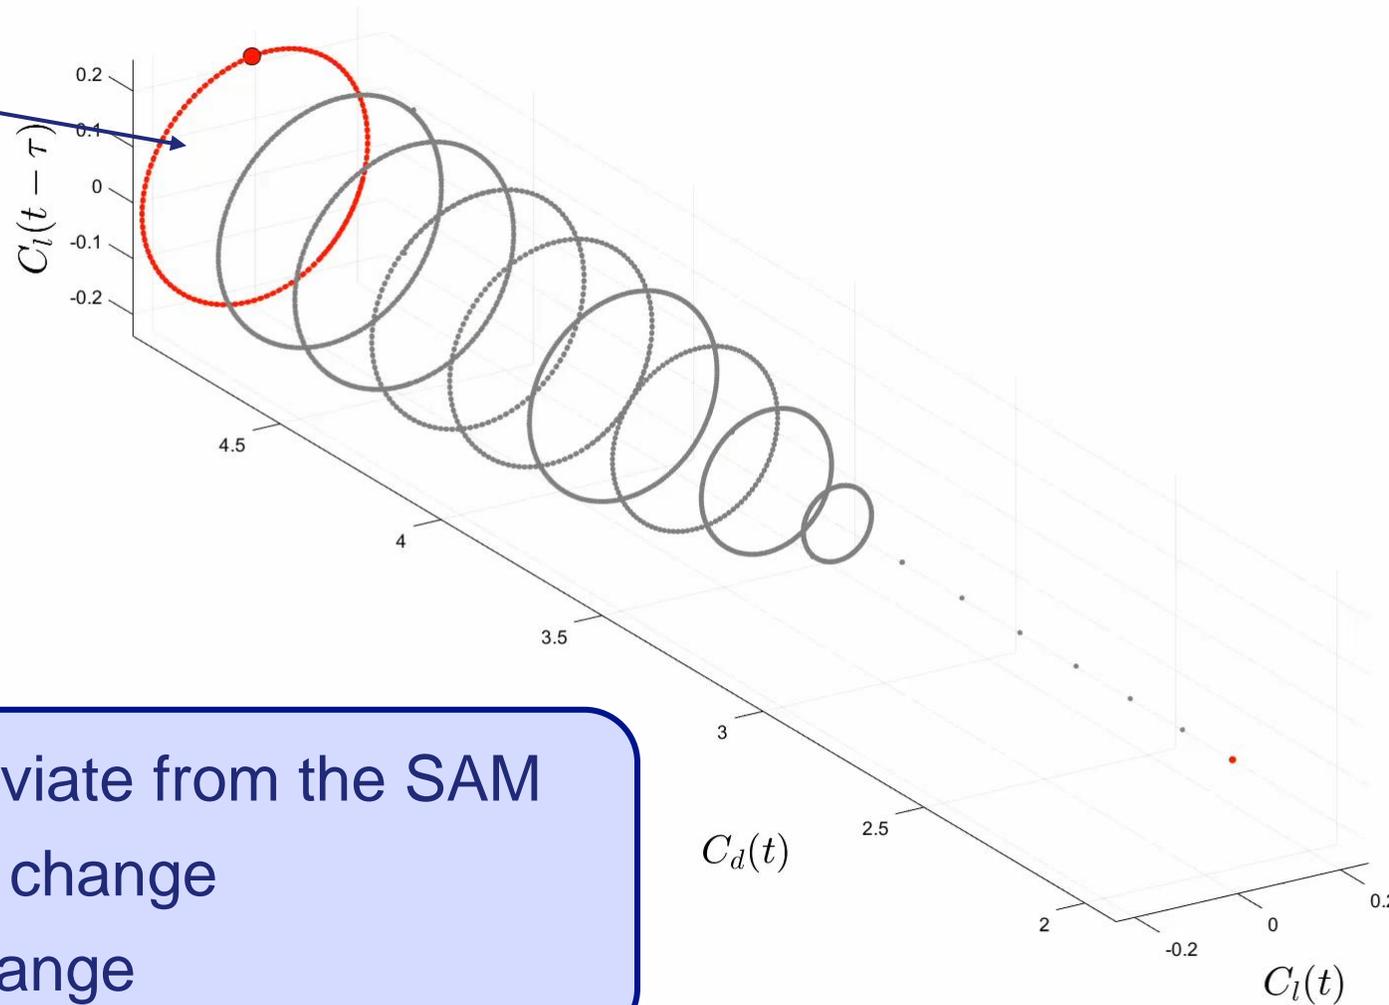

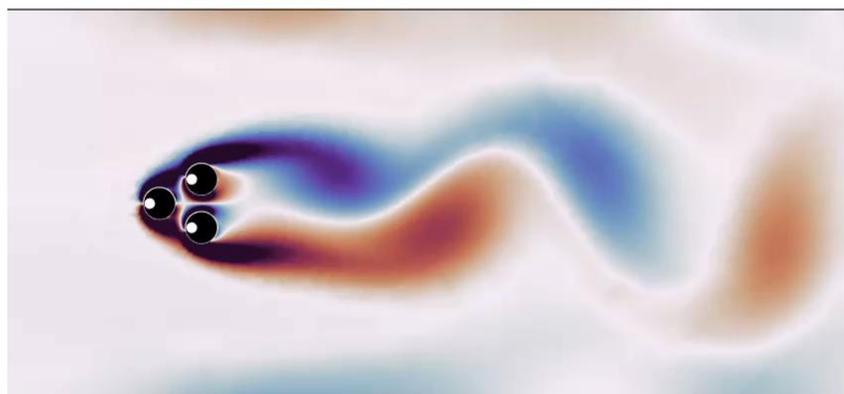

$$\dot{\mathbf{q}} = f(\mathbf{q}, b)$$

# Analysis & modelling of the fluidic pinball under time-varying actuation

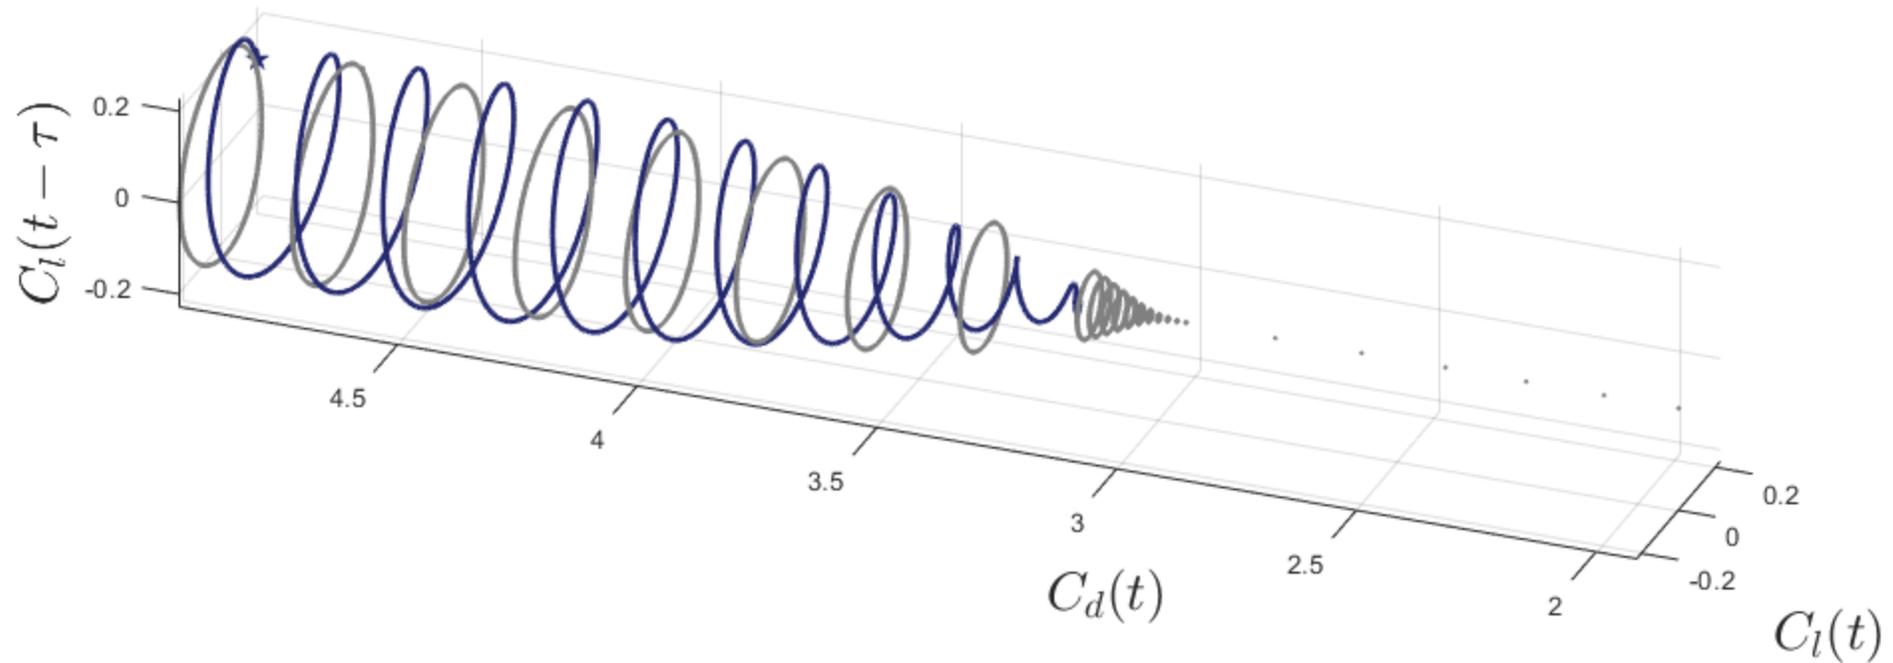

Change in 10 periods ( $\frac{db}{dt} = 0.15$ )

Fast control trajectories deviate from the SAM

- Magnitude of change
- Rate of change

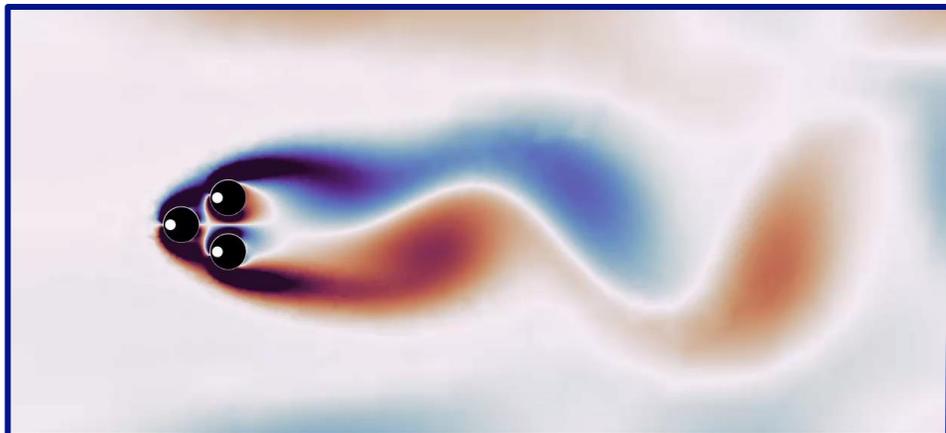

# Analysis & modelling of the fluidic pinball under time-varying actuation

$$\tilde{b} = \beta b \rightarrow \beta = \frac{\tilde{b}}{b}$$

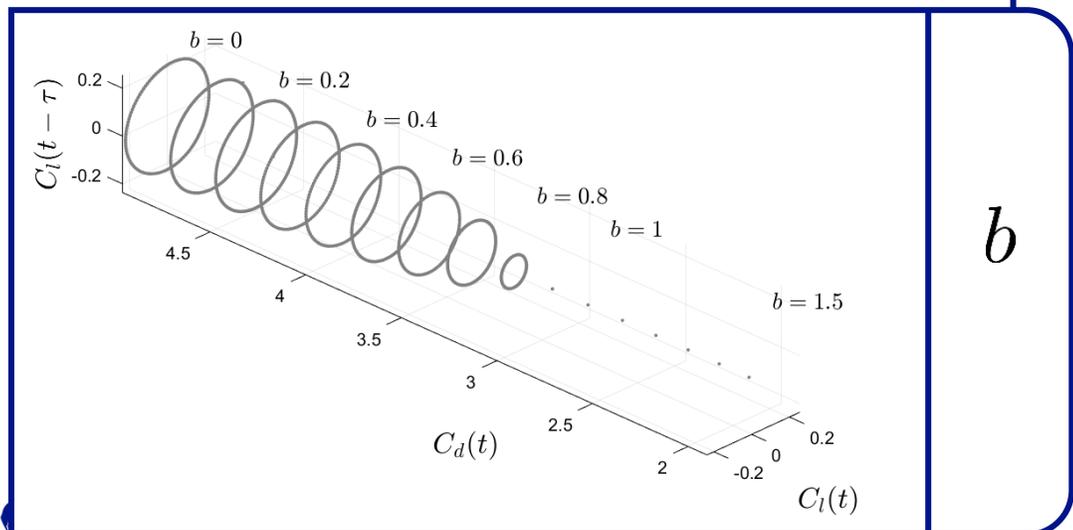

Fitting parameter  $\beta$

# Analysis & modelling of the fluidic pinball under time-varying actuation

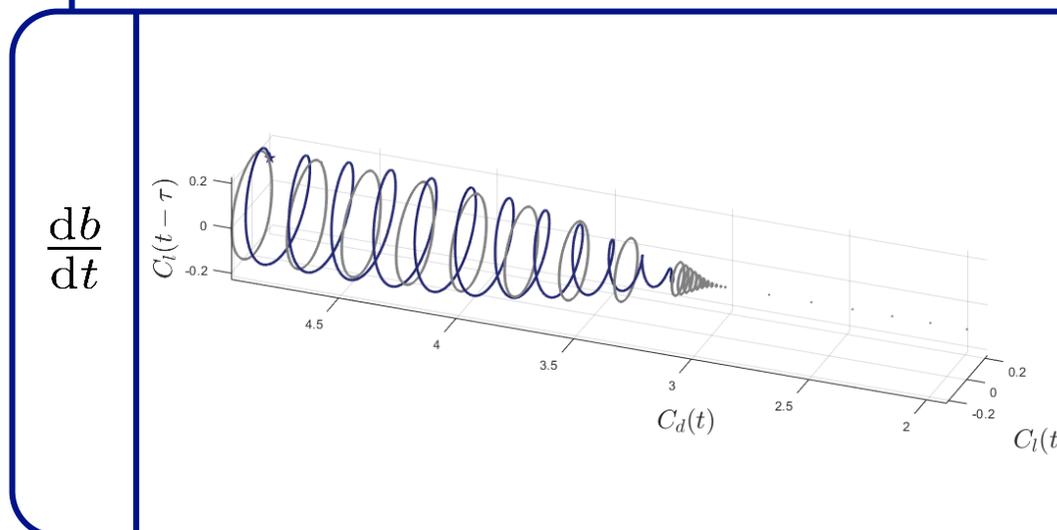

$$\mathbf{q} = \begin{bmatrix} C_l(t) \\ C_l(t - \tau) \\ C_d(t) \end{bmatrix}$$

$$\dot{\mathbf{q}} \dot{\mathbf{b}} = \mathbf{f}(\mathbf{q}, \mathbf{b}, \frac{db}{dt})$$

$b$

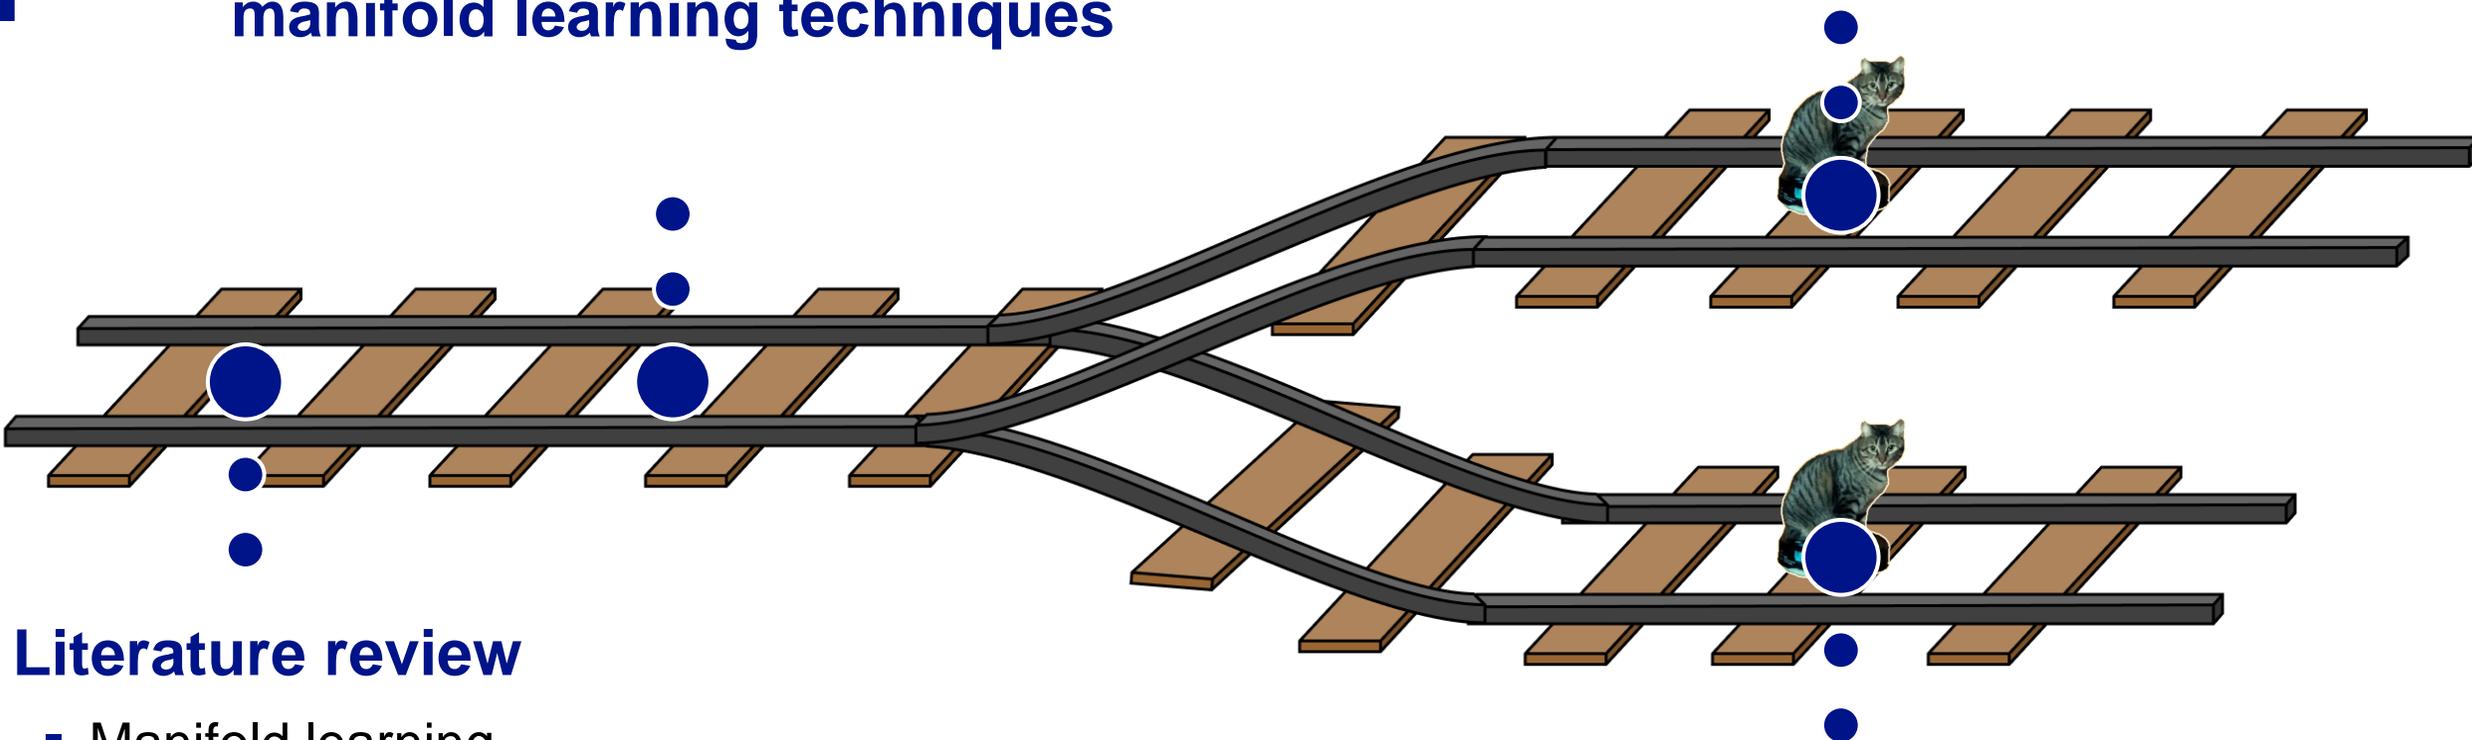

$\frac{db}{dt}$

# What I have done in my ongoing PhD journey

## Comparative analysis of manifold learning techniques

## Analysis & modelling of the fluidic pinball under time-varying actuation

## Literature review

- Manifold learning
- Data-driven methods

## Fluidic pinball experiment

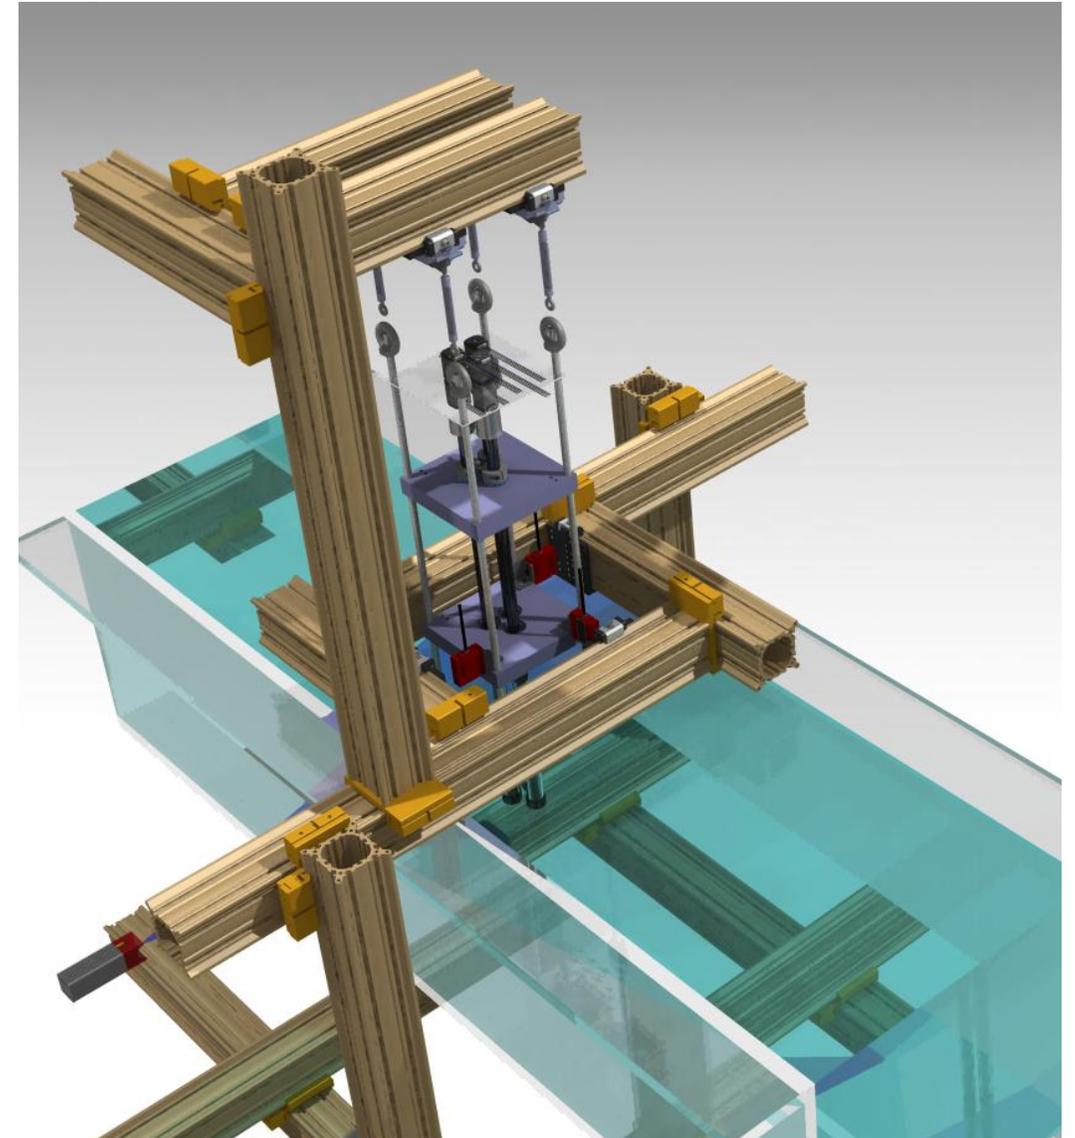

## Synchronized measurements

### Reconstruct feature space

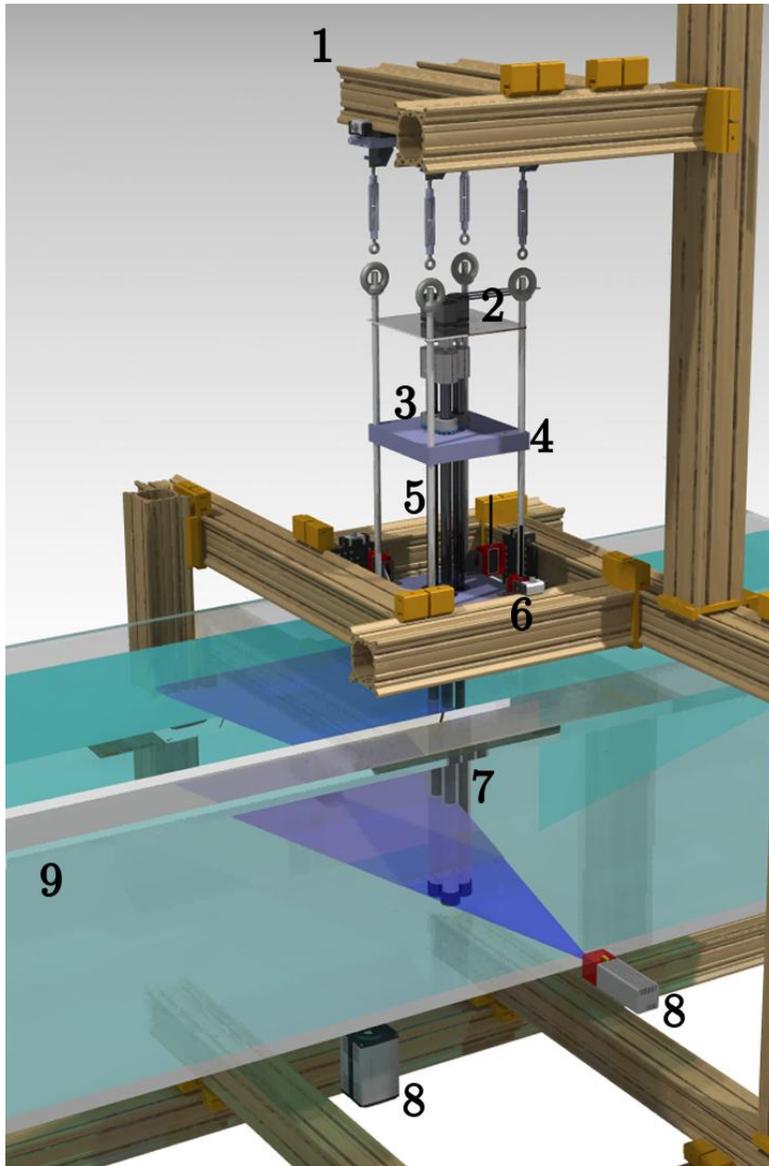

$$\mathbf{q} = \begin{bmatrix} C_l(t) \\ C_l(t - \tau) \\ C_d(t) \end{bmatrix} \simeq \begin{bmatrix} \gamma_1 \\ \gamma_2 \\ \gamma_3 \end{bmatrix}$$

**Force  
measurements**

**Low-dimensional  
coordinates from  
snapshot velocity  
field data**

# Fluidic pinball experiment

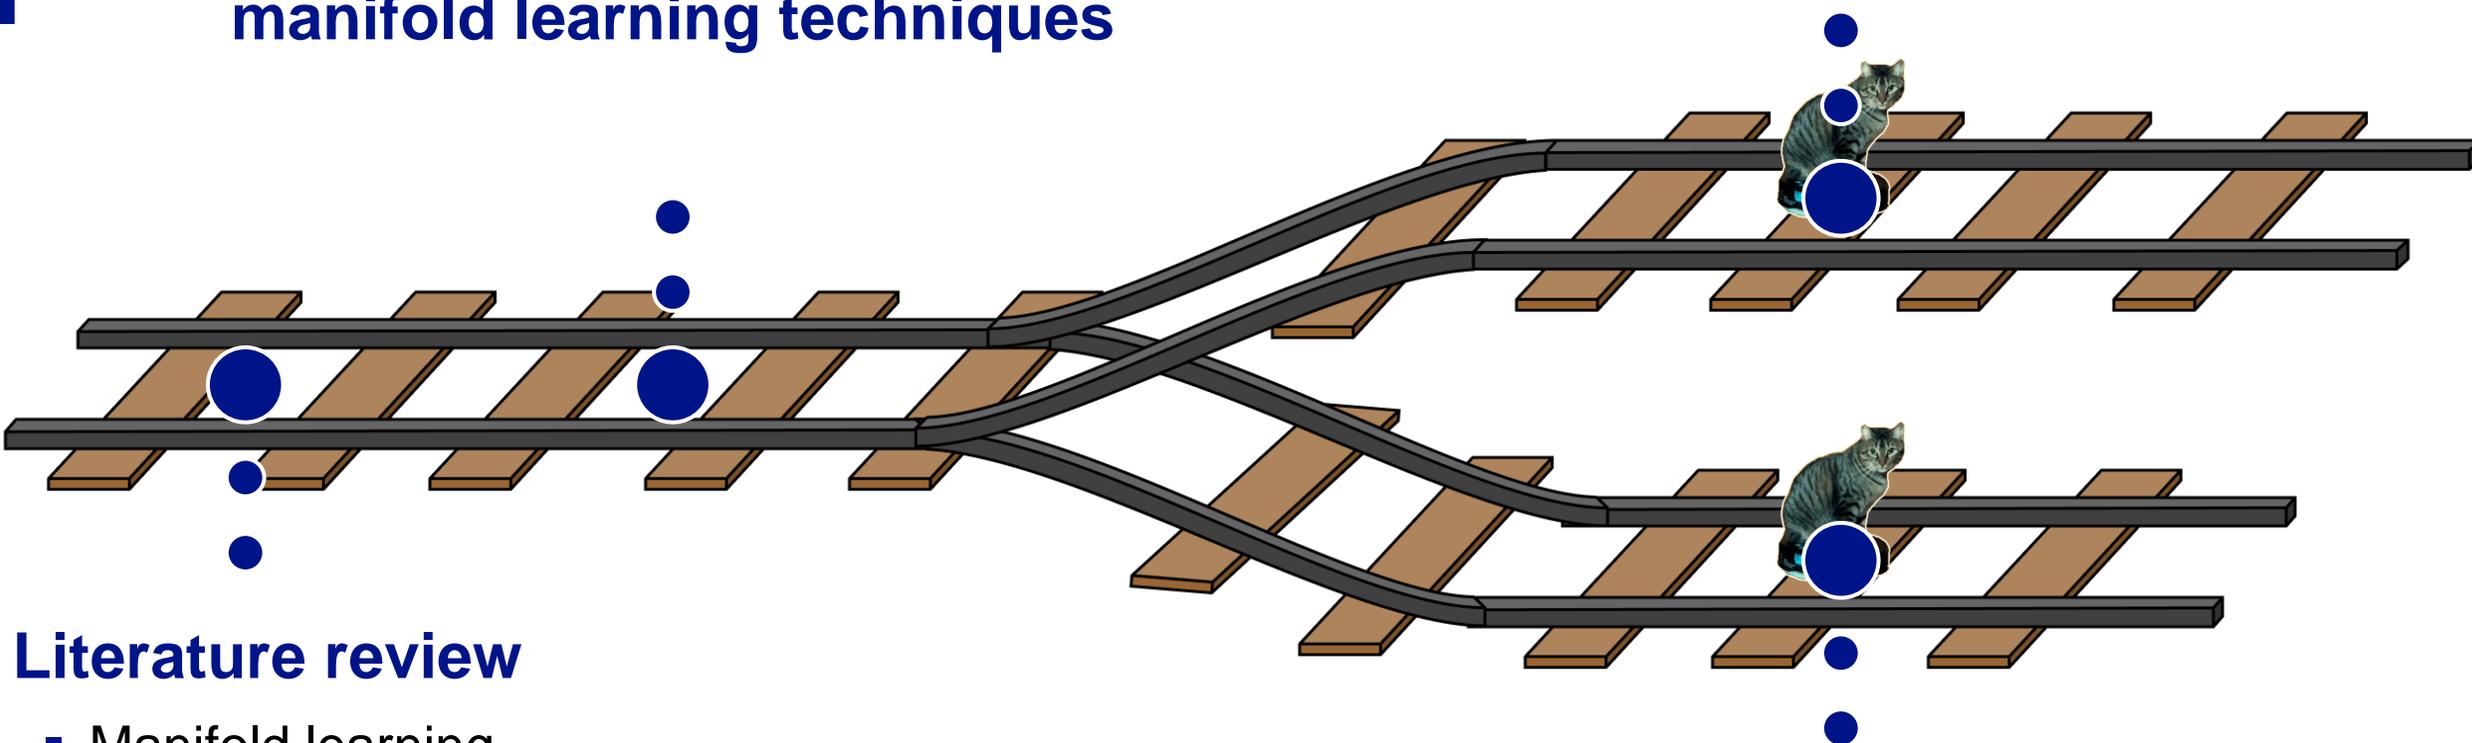

1. Beam structure for supporting the experiment
2. Stepper motors for actuating the cylinders
3. Bearing configuration for blocking displacement
4. Supporting plates for ensuring alignment
5. Aligning metallic bars for robustness
6. Load cells for measuring forces
7. Fluidic pinball configuration inside water
8. PIV configuration. Laser for illuminating particles and camera for capturing particles displacement
9. Water tunnel test section

# What I have done in my ongoing PhD journey

## Comparative analysis of manifold learning techniques

## Analysis & modelling of the fluidic pinball under time-varying actuation

### Literature review

- Manifold learning
- Data-driven methods

### Fluidic pinball experiment

## Conference contributions

- **2nd International Conference on Mathematical Modelling in Mechanics and Engineering.** September 12-14, 2024, Belgrade, Serbia
- **APS Division of Fluid Dynamics Annual Meeting 2024.** November 24-26, 2024, Salt Lake City, UT, USA
- **EuroMech Colloquium on Data-Driven Fluid dynamics and 2<sup>nd</sup> ERCOFTAC Workshop on Machine Learning for Fluid Dynamics.** April 2-4, 2025, London, United Kingdom
- **1<sup>st</sup> International Symposium AI and Fluid Mechanics.** May 27-30, 2025, Chania, Greece.

## Courses attended

- **Particle Image Velocimetry.** Von Karman Institute. December 2-5, 2024, Brussels, Belgium.
- **WG3/WG4 Meeting – Workshop: Machine Learning for Complex flows.** CYPHER. February 6-7, Madrid, Spain

## Dissemination activities

- *Descubriendo patrones desconocidos en la turbulencia: secretos detrás de los datos.* **Noche Europea de los Investigadores 2024.** September 27, 2024.
- *¿En qué se parece un globo a un motor de avión? Descubre la magia de un aerorreactor.* **Semana de la Ciencia 2024.** November 14, 2024.
